# 鋼鐵廠設備

## Steel Plant

中鋼機械負責中鋼集團擴建及大型改造案，提供重要設備與部品，並具備規劃重捲、分切、裁剪、檢驗等附屬產線的能力。

中鋼機械是台灣最大型之重型機械製造公司，擁有完整的鋼廠製程各式設備供應實績，包含原料輸送、煉鐵、煉鋼、連鑄、軋鋼、成品線，同時提供現場安裝、試車服務。

CSMC undertakes the expansion and revamping projects of the CSC Group, and provides key facilities and components, as well as be able to plan and integrate the processing lines, including recoil and slit, shear and inspection station. CSMC is the largest heavy machine manufacturing company in Taiwan. It has a complete supply record in raw material transportation, iron making, steel making, continuous casting, rolling and packing process equipment for steel plant. Not only providing equipment, CSMC can provides installation and commissioning services at job site.

## 魚雷車

透過魚雷車運送高溫鐵水至煉鋼廠，是煉鋼過程中至關重要的環節。中機整合鑄造、冷作焊接、機械加工及組裝測試，以高品質工藝，打造中鋼所需 300 噸魚雷車，為提升中鋼集團鋼鐵產能與製程安全奮鬥推進，貢獻一己之力。

### Torpedo Car

Conveying high-temperature molten iron to the steel smelting plant is a crucial ring in the steel making process. By integrating casting, cold work welding, machining, assembly and tests, CSMC fabricated the 300 ton Torpedo Car necessary for CSC via high-standard craftsmanship, contributing its efforts in improving steel productivity as well as promoting process safety of CSC Group.

中鋼 W3 二廠 270 噸盛鋼桶  
CSC 270 ton ladle

## 盛鋼桶

盛鋼桶是一種用來運送、冶煉和傾倒熔融金屬的容器，廣泛被應用於煉鋼廠製程中。中機打造鋼廠所需高品質盛鋼桶，除新品製作外，亦提供舊品整修服務，延長產品使用。

## Ladle

A ladle is the container used for conveying, smelting and pouring the molten metal, it is extensively used in smelting processed of Steel Plants. CSMC fabricates high-quality ladles for steel plants. In addition to new products, we also provide refurbishing of old ladles for prolonging their service life.

# 碼頭輸送設備

## Wharf Material Handling System

原物料輸送系統廣泛應用於鋼廠、電廠、紙廠、水泥產業，因應集團公司中龍鋼鐵擴建，中鋼機械於 2006 年進入連續式卸船機製作領域，並於 2015 年成功回銷日本市場。

Material handling system is extensively used in the steel plant, power plant, pulp plant and cement industry; to cope with the expansion of Dragon Steel (a Group Subsidiary), CSMC entered into the manufacturing of Continuous Ship Unloader in 2006, with products exported to Japan successfully in 2015.

# 天車與 起重設備 Crane & Lifting System

興達海洋基礎公司整廠天車  
Whole Plant Crane of SING DA MARINE STRUCTURE

天車為產線重要的吊運設備，中機專注於 CMAA( 美國天車製造協會 )E、F 等級天車承製，並已累積超過三百台的工程統包實績，從機電設計、生產規劃、採購、製作、品質管控、運輸、安裝試車至工檢作業等各細節，中機皆展現專業的工程管理能力，提供客戶一個完整的吊運設備解決方案。

Crane is an important lifting equipment for the production line. CSMC endeavored to make CMAA Class E and Class F Overhead Cranes by turnkey basis, and accumulated references exceeding 300 sets. CSMC expresses its professional project management capabilities from mechanical and electrical design, planning, procurement, manufacturing, quality control, transportation, installation, commissioning, up to detailed industrial inspection tasks, providing clients solutions.

# 風力發電

## Wind Power

中鋼機械擁有全台灣最豐富的陸域塔架製造經驗，累計至今，全台共有 295 套風力塔架為中鋼機械製造。

此外，中鋼機械作為離岸風電構件國產化重要成員之一，協助興達海基公司承攬沃旭大彰化離岸風場案水下基礎，由中鋼機械供應關鍵構件，如：轉接段 (TP)、節點 (Node)、靠船鋼管 (Boat Landing)、插樁 (Stabbing Pin)、腳柱 (Leg) 等，是國內第一家百分百國內製造且達標的公司。

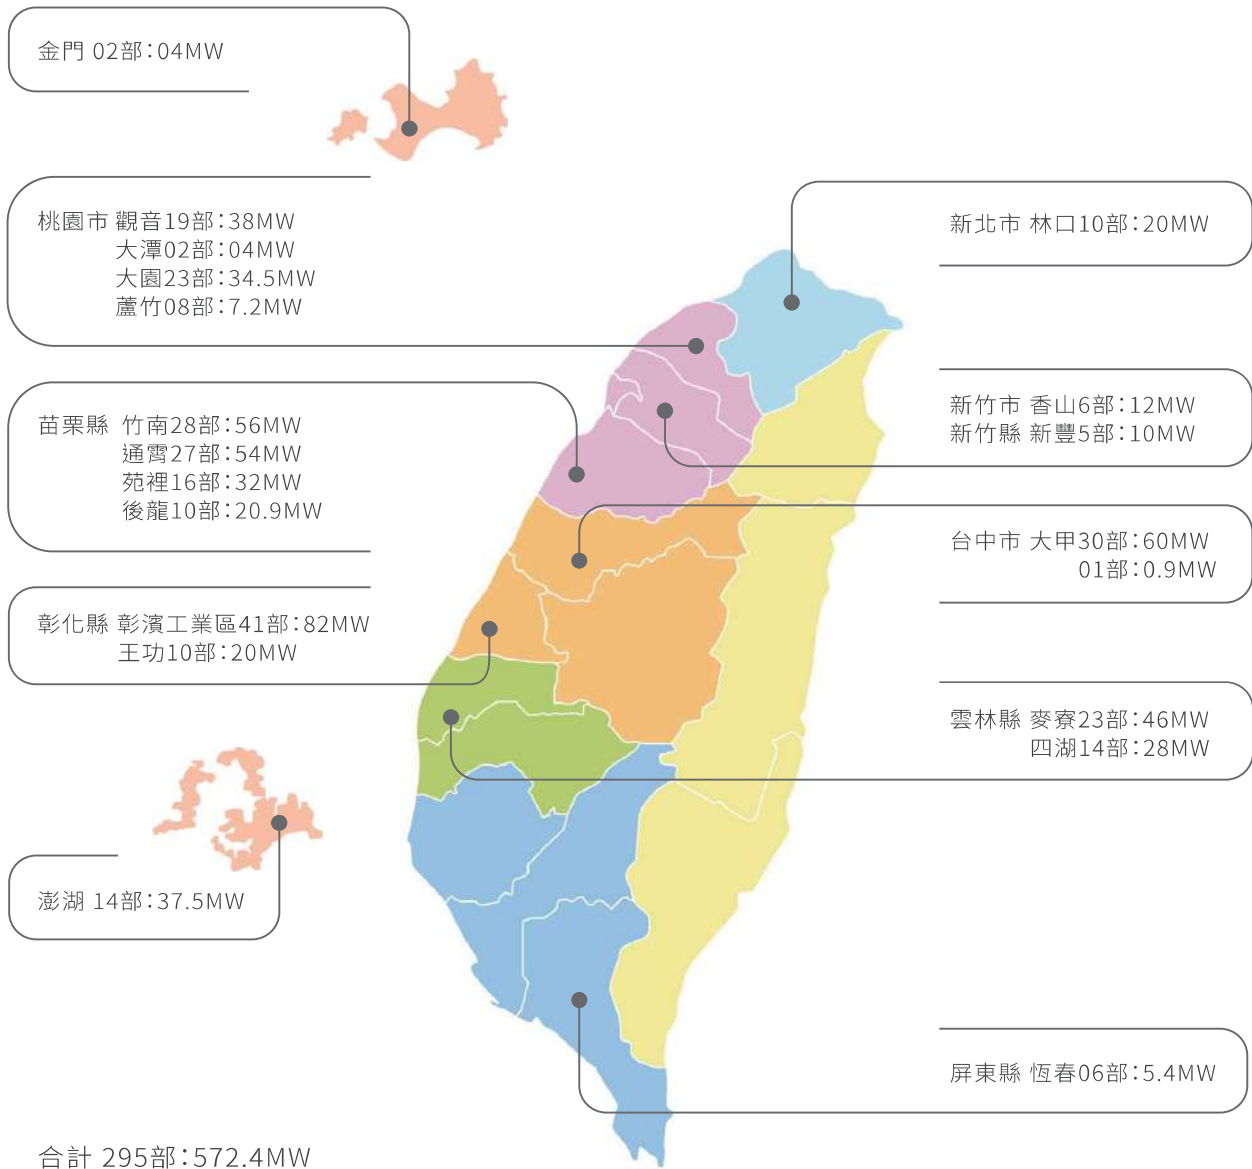

CSMC is the most experienced maker of onshore wind towers in Taiwan; with 295 sets delivered up to now.

Furthermore, as a key member of domestic offshore wind power jacket fabricator, CSMC is the first one to achieve the goal of applying 100% local made.

CSMC supply the critical components such as Transition Pieces (TP), Nodes, Boat Landings, Stabbing Pins, Legs, etc., which has successfully assisted Sing Da Marine Structure (SDMS) to finish Orsted Greater Changhua Offshore Wind farm project.

## 台灣高鐵工程車車體底盤架及附屬結構

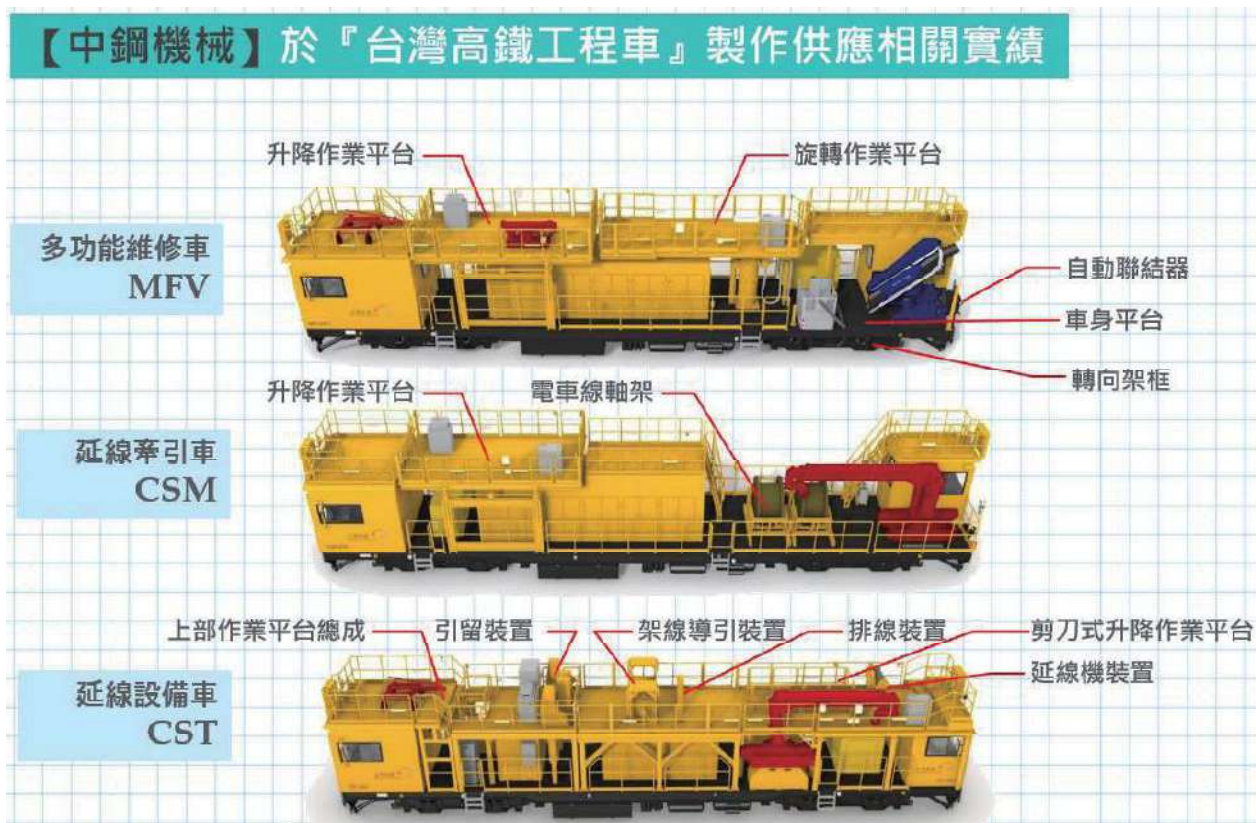

由中鋼設備處設計開發，結合中鋼機械之產製能力（鑄造、冷作焊接、機械加工及組裝測試），將台灣高鐵現有六款日系及德系工程車型，依維修及操作需求量身打造，整合為多功能維修車、延線設備車及延線牽引車等三款工程車，兼具客製化、整合性及安全性等優點，有助於提升台灣高鐵維修作業能力。

### THSRC Engineering Car Chassis Frame and Auxiliary Structure

Designed and developed by the CSC Plant Engineering & Maintenance Dept., in combination with CSMC's production capabilities (casting, fabrication, machining, and assembly and commissioning), the existing 6 models of Japanese and German maintenance vehicles are integrated into 3 types of maintenance vehicles: multi-function vehicle (MFV), Catenary Stretch Trailer (CST) and Catenary Stretch Motor (CSM), which have the advantages of customization, integration and safety, and will help to improve THSRC maintenance operations

## 淡海輕軌機廠設備

大眾交通運輸是促進都市發展的重要基礎，近年來各地均積極推動爭取軌道建設計畫。中鋼機械遵循「國車國造」理念，承接「淡海及安坑輕軌機廠全功能維修基地」，中鋼機械負責設計、採購、製作、運輸、安裝、試車、保固、系統整合測試、訓練及 2 年備品，致力於滿足輕軌列車營運所需儲車、維修、列車調度及物料儲存等需求。

### Danhai LRT Depot Facilities

Public transportation is fundamental to facilitate urban developments with emerging projects; localities are actively seeking track infrastructure projects in recent years. Abiding by the policy of “Localized development and manufacturing of rail transportation”, CSMC was contracted for the “Danhai and Ankeng Full-function Light Rail Depot” project, carrying out design, procurement, manufacturing, transport, installation, commissioning, warranty, system integration and tests, and training as well as being responsible for providing 2-year spare parts. It endeavored to satisfy the needs in regard of vehicle storage, maintenance, train dispatching and material storage required for operating light rail trains.

# 轉向架框

## Bogie Frame

中鋼機械於 2005 年建立轉向架框專業產線，持續與國際級車輛系統廠合作捷運及鐵路電聯車用轉向架框製作。2016 年響應政府國車國造政策，參與輕軌列車轉向架框製作。

CSMC established a specified production line for bogie frames in 2005, and continuing collaboration with international railway rolling stock vendors in making bogie frames for MRT and EMUs. In 2016, in response to the government's "design and build localization" policy for railway rolling stock, CSMC participated in the manufacturing of bogie frames for light rail trains.

# 水利工程

## Hydraulic Engineering

中鋼機械延續台機技術並拓展各項大型水利工程設備業務，承攬多項抽、排水系統之水工設備及相關零組件安裝更新工程，其中抽水機組、現場安裝與專案管理經驗尤其豐富。工程實績包含林口電廠及大林電廠 CWP 擴建工程、建國抽水站暨擴建站、新生抽水站暨擴建站、全市抽水站、玉成抽水站等抽水機組設備更新。

Based on TMMC's technique CSMC continues on hydraulic engineering and participates in pump station, drainage system, and related revamping projects, especially good at site installation and management. Supply records are as following:TPC Linkou and Talin CWP project, Jianguo pump station, Xinsheng pump station, and Yucheng pump station renewal.

# 鑄件

## Casting

### 產品包括：

1. 鋼鐵廠設備：輾輪軸承座、渣盤、燒結台車及相關鑄件、天車輪、煉焦爐門、爐門框、保護板、滾筒渣處理設備、魚雷車耳軸 / 澆口等相關鑄件。
2. 水泥、電廠設備：磨球、磨台、壓環等。
3. 軌道車輛零件：輪軸箱、中心銷、連結器等。

### Product:

1. Steel Plant Facilities: roller bearing house, slag pan, sintering trolley and relevant castings, crane wheels, coke oven door, door frame, protection plate, roller slag treatment facility, torpedo car lug/sprue and relevant castings.
2. Cement Plant, Power Plant Facilities: grinding ball, grinding table, clamping ring, etc.
3. Rolling Stock Parts: wheel axle, center pin, coupler, etc.
